

APPENDIX F
CHILD ASSENT FORM

**CHILD ASSENT FORM
IRB # 2007-01-176 EX**

**ASSESSING THE IMPACT OF ONLINE INTERVENTIONS
FOR RETEACHING MATHEMATICS**

We would like to invite you to take part in this study. We are asking you because you are someone currently studying fifth grade math in Lincoln Public Schools

In this study we will try to learn more about how using the Internet affects the way you learn math. You will be asked to use a set of web-based materials to practice similar math problems you have been studying in class. You will be scored along the way and told when you get a right or wrong answer. Additionally, you will be given an opportunity for additional help when you answer the question incorrectly.

The reason we are doing this study is that it is possible that this approach to study math may help you and other students learn math using the Internet and improve your overall scores in class.

Your parents will also be asked to give their permission for you to take part in this study. Please talk this over with your parents before you decide whether or not to participate. You do not have to be in this study if you do not want to and it will not affect your grade. If you decide to participate in the study, you can stop at any time.

If you have any questions at any time, please ask one of the researchers.

IF YOU SIGN THIS FORM IT MEANS THAT YOU HAVE DECIDED TO PARTICIPATE AND HAVE READ EVERYTHING THAT IS ON THIS FORM. YOU AND YOUR PARENTS WILL BE GIVEN A COPY OF THIS FORM TO KEEP.
